

# Cubicle Hygiene

Caring for clean environments

## Wipe away those fears

Research has shown that one of the biggest concerns people have in washrooms is touching contaminated surfaces caused by the 'sneeze effect' of flushing the toilet. These fears can literally be wiped away with the toilet seat sanitizer, giving total peace of mind to each user.

### Compact toilet seat sanitizer

The toilet seat sanitizer is positioned in each cubicle close to the toilet tissue dispenser. Each user can dispense the alcohol-based solution onto the tissue and wipe around the toilet seat before using it to improve hygiene confidence and reduce the risk of contamination associated with shared toilets.

- Reduces the risk of cross-infection, as it attacks common infections such as Hepatitis A & B and gastro-enteritis, which live and breed on toilet seats. The first picture below uses water-sensitive paper to demonstrate contamination caused by 'sneeze effect' of flushing
- Quick-drying solution - the seat can be used immediately
- Pleasantly fragranced fluid, making it clear when it's been used
- Useable on other contact points prone to harbouring bacteria such as the flush and door handles, giving the user extra reassurance
- Compact and discreet dispenser that doesn't crowd the cubicle

Caring for clean environments

## Toilet tissue

Toilet tissue is an essential item in any cubicle. Initial offer a wide range of toilet tissue dispensers to suit every type of washroom, which are both hygienic and cost effective in use. We provide a full telesales service for repeat orders to help you manage your washroom supplies. Two different systems are featured, but many others are available too. Please ask for a copy of our Washroom Supplies catalogue to view our full range.

- Choice of systems to suit the traffic needs of individual washrooms. Large dispensers for busy washrooms and more compact versions for smaller ones
- Choice of long rolls for busy washrooms to reduce the need to top up as regularly or individual sheets for a more personal touch
- Tissue is enclosed and therefore not in contact with airborne bacteria - reducing the risk of cross infection
- High quality, comfortable tissue
- View windows are situated on all dispensers as a quick check for cleaning staff
- Dispensers are lockable to avoid pilfering and vandalism

## The Initial promise

We are committed to providing high quality services to keep users healthy by minimising their risk of exposure to the bacteria that are present in all washrooms. We take pride in delivering the highest levels of service to enable you to keep your washrooms looking good, thereby enhancing and protecting your reputation.

## Why choose us?

We offer a complete washroom service from the rental and maintenance of equipment to the provision of washroom supplies.

- Professional installation by our trained engineers
- Customised service agreements to suit your needs
- Dedicated account management
- Local and responsive service from a nationwide network of service centres
- Can help you comply with your hygiene and environmental duties under the relevant legislation
